

SMART S72 Jacquard machines

Our Smart S72 electronic Jacquard machine is particularly suitable for weaving names and patterns on selvages and fabric in a wide variety of applications. Weaving a brand name enhances the value of the fabric and helps prevent counterfeiting.

Advantages:

- › Easy to adapt and versatile
- › Safe, straight forward access for making machine adjustments
- › User-friendly programming and control
- › Minimal, straightforward maintenance

Main features	SMART S72
Field of application	Rapier, projectile, air jet weaving machines and shuttle looms
Fabric suitability	Labeling and logos on selvages and in all flat fabrics, weaves
Principle of operation	Double-lift open-shed Jacquard machine, crank shed movement, parallel shed
Drive system	Belt drive / Independent servo Motor (optional)

Features / Model	SMART S72
Available formats *	72 hooks (for selvages)
Module Type	M5

Smart S72 is a versatile and efficient model for high speed weaving machines. This model has the following features –

- Independent drive using latest technology of servo motor in place of belt drive for high speed weaving machines.
- 72 hooks in each head for more precise effective and eye-catching patterns, designs, motifs etc.
- Pattern making adjustable on fabric width on selvages or at the desired location of the fabrics.
- Same or different monogram on each sets of fabric selvages for discriminative fabric identification.
- Pre programmed change of monogram to facilitate automatic change of monograms without stopping the weaving machines.
- Compact, vibrant and heavy duty structures for smooth and vibrant free working.
- High quality industrial components, hardwares are used to ensure that quality standards are consistently maintained.
- Easy installation on nick of time so that the weaving machine's down time is minimized in installing CPM.
- Power supply from weaving machine only so that no additional power line is required in operating the machine.
- Synchronize with any Projectile (Sulzer), Rapier, Airjet, Waterjet Weaving Looms.
